#### Election/Restriction

1. An election of species I (claim 14) without traverse is acknowledged. Claims 15-18 are withdrawn from consideration.

-Claim-Objections \_\_\_\_\_\_

2. Claim 21 is objected to because of the following informalities: line 2, "12" should be changed to -20--. Claim 21 recited "said diffusion sheet", claim 20 recites a diffusion sheet.

Claim 21 is interpreted as dependent from claim 20. Appropriate correction is required-

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 12-14, 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamauchi et al (US 5745202).

Yamauchi discloses a liquid crystal display (LCD) device comprising (see Figure 8A, 8B): a liquid crystal panel comprising liquid crystal layer (cells); a first substrate 112 disposed on a displaying side of the liquid crystal (LC) layer, and a second substrate 117 disposed on a reverse side of the LC layer; a liquid crystal driver 130 electrically connected with the liquid crystal panel through a circuit pattern (see Figure 4); a light shielding material 10/11/12 disposed

Application/Control Number: 09/876,320

Art Unit: 2871

adjacent the liquid crystal driver so as to prevent outer light from being incident to the liquid crystal driver; the liquid crystal driver is mounted on the liquid crystal panel by a light interceptive/shielding member 190 disposed on the liquid crystal panel so as to cover one end of a film carrier 210 and a side surface of the liquid crystal driver (see Figure 8).

Yamauchi discloses the light interceptive/shielding film 190 made of sponge or rubber.

Yamauchi discloses that other materials such as silicon, resin may be used for the light interceptive/shielding film. Therefore, it would have been obvious to one of ordinary skill in the art to employ materials such as resin since it would-have-yielded-a-functional-equivalent-light interceptive/shielding film.

Per claims 13-14, see Figure 8.

Per claim 19, see col. 1, lines 15-17.

#### Allowable Subject Matter

5. Claims 20-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Application/Control Number: 09/876,320

Art Unit: 2871

### **Contact Information**

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toan Ton whose telephone number is (703) 305-3489. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308 0956.
